

# SPECIALITÀ CETARESI DAL 1950

Delfino Battista is the guardian of an art which has been transmitted from generation to generation.

The success of our products is also the result of careful research on flavours and the use of carefully selected ingredients. Our preparation preserves the organoleptic properties of the product and brings out the taste and quality of the fish.

**ingredients:** salted anchovy extract, salt.

**shelf life:** 24 months

**preservation:** ambient temperature.

## Traditional recipe from Cetara

### Linguine or Spaghetti with colatura di alici di Cetara (4 people recipe)

Boil 400 gr of pasta in unsalted water. Meanwhile mince together parsley, garlic, hot pepper (if appreciated), add 8 spoons of Extra virgin olive oil, and 4 spoons of Colatura di Alici "Delfino".

Blend together the sauce and the pasta "al dente", and serve it.

The "colatura di alici," with its unique aroma, can be used as a substitution of salt, with the addition of extra virgin olive oil, to give more flavour to fresh or boiled vegetables, cereal soup, and many fish dishes.

## TOP LINE

### ● **Capriccio di mare**

**capacity:** jars per box:

110 ml 6
